LESSON 07 • MODULE 3: AI ASSISTANTS AT WORK

Copilot is not a button, it is a family

Which AI assistants Microsoft has, where they live, what is free, and how to check their answers

Family map • for you • for work • agents • for companies • 2 live demos • homework without a licence. All courier data is synthetic. Facts as of 13 Oct 2026.

THE MAP

The Microsoft AI family: who lives where

One Copilot brand, four zones. Choose by one question: **whose information is it and where does it live?**

Teams poll: which Copilot do you already have? in Windows · in Edge · on the phone · work/school · GitHub · none

For you

personal account, free

- Copilot
- Windows 11
- Edge
- Paint, Photos
- Bing

Microsoft 365

work and school: Copilot Chat free; with a licence, your data

- Word
- Excel
- PowerPoint
- Outlook
- Teams
- OneNote
- OneDrive
- SharePoint
- Loop, Pages

AGENTS: Researcher · Analyst · Cowork · Facilitator · Agent Builder

For developers

code, models, own agents

- GitHub Copilot
- VS Code
- Foundry
- Copilot Studio

For the company

turned on by IT: sales, processes, reports, security

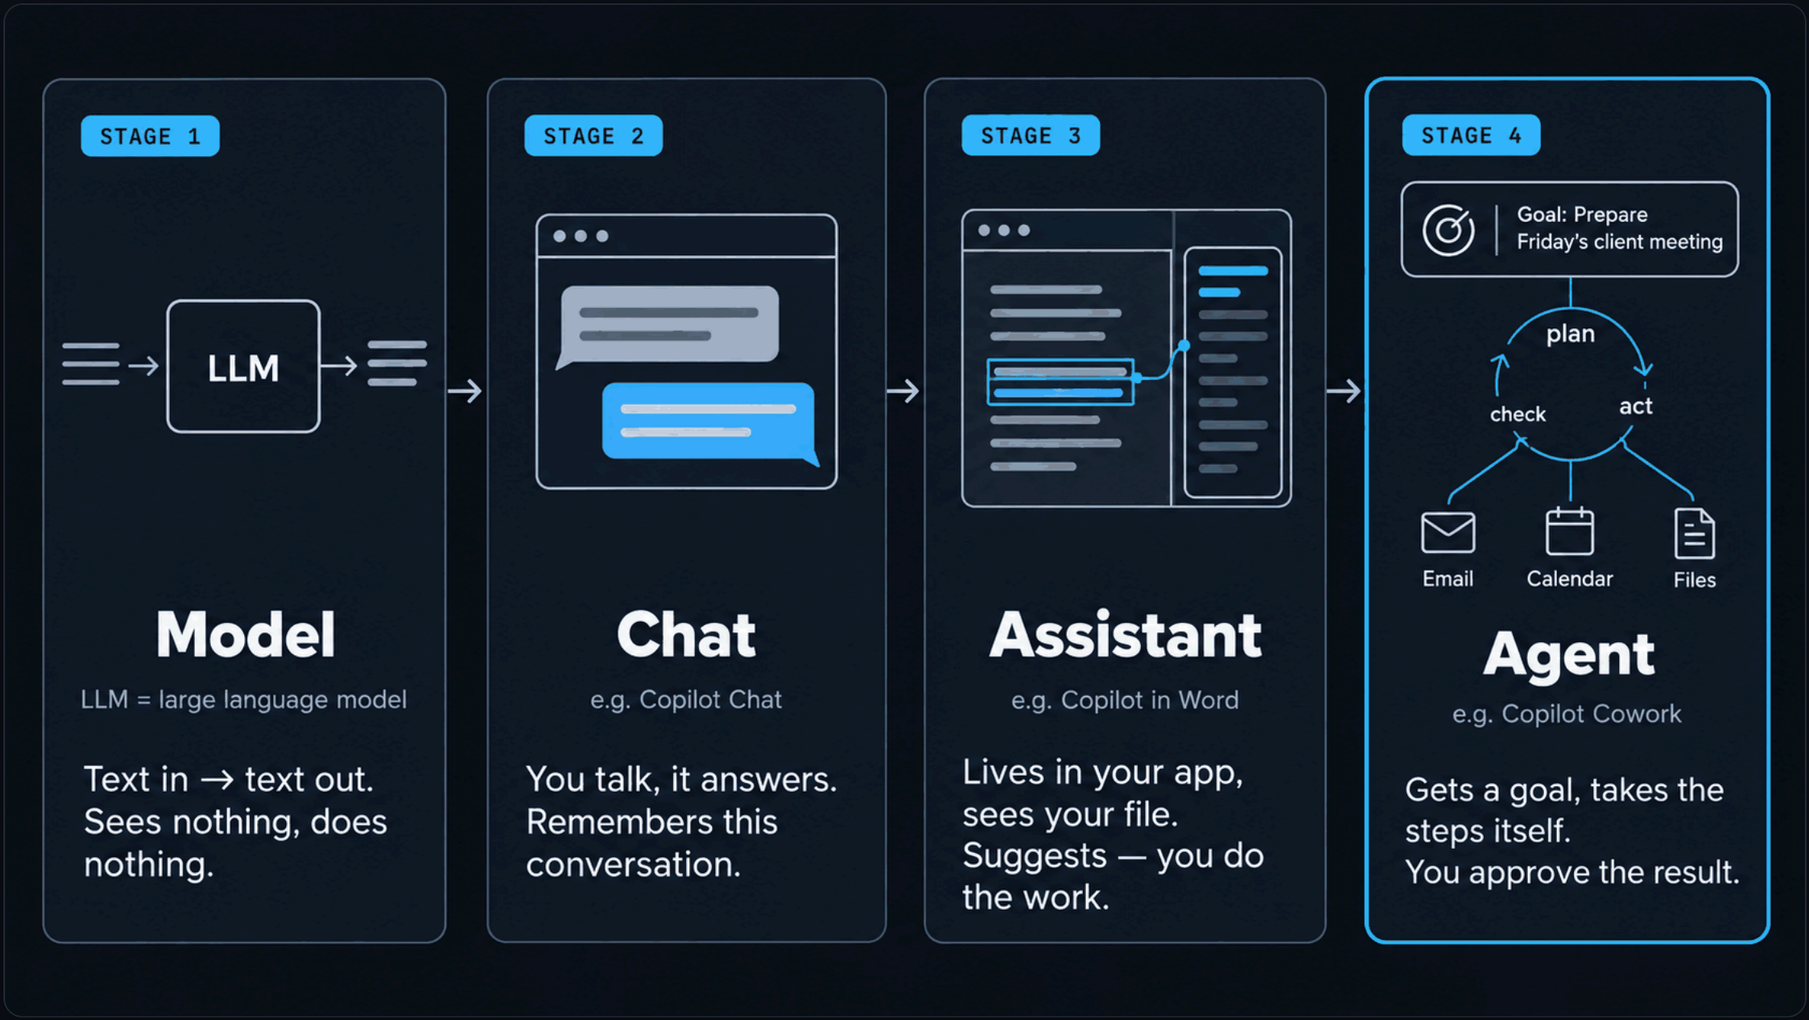

- Dynamics 365
- Power Apps
- Power Automate
- Power BI, Fabric
- Security Copilot
- Agent 365
- Dragon Copilot

Inside them all: `OpenAI GPT` `Anthropic Claude` `Microsoft MAI` + **what Copilot can see** (web, file, mail, screen)

NEW WORDS

Model → chat → assistant → agent

Each stage = the previous one **+ one new ability**.

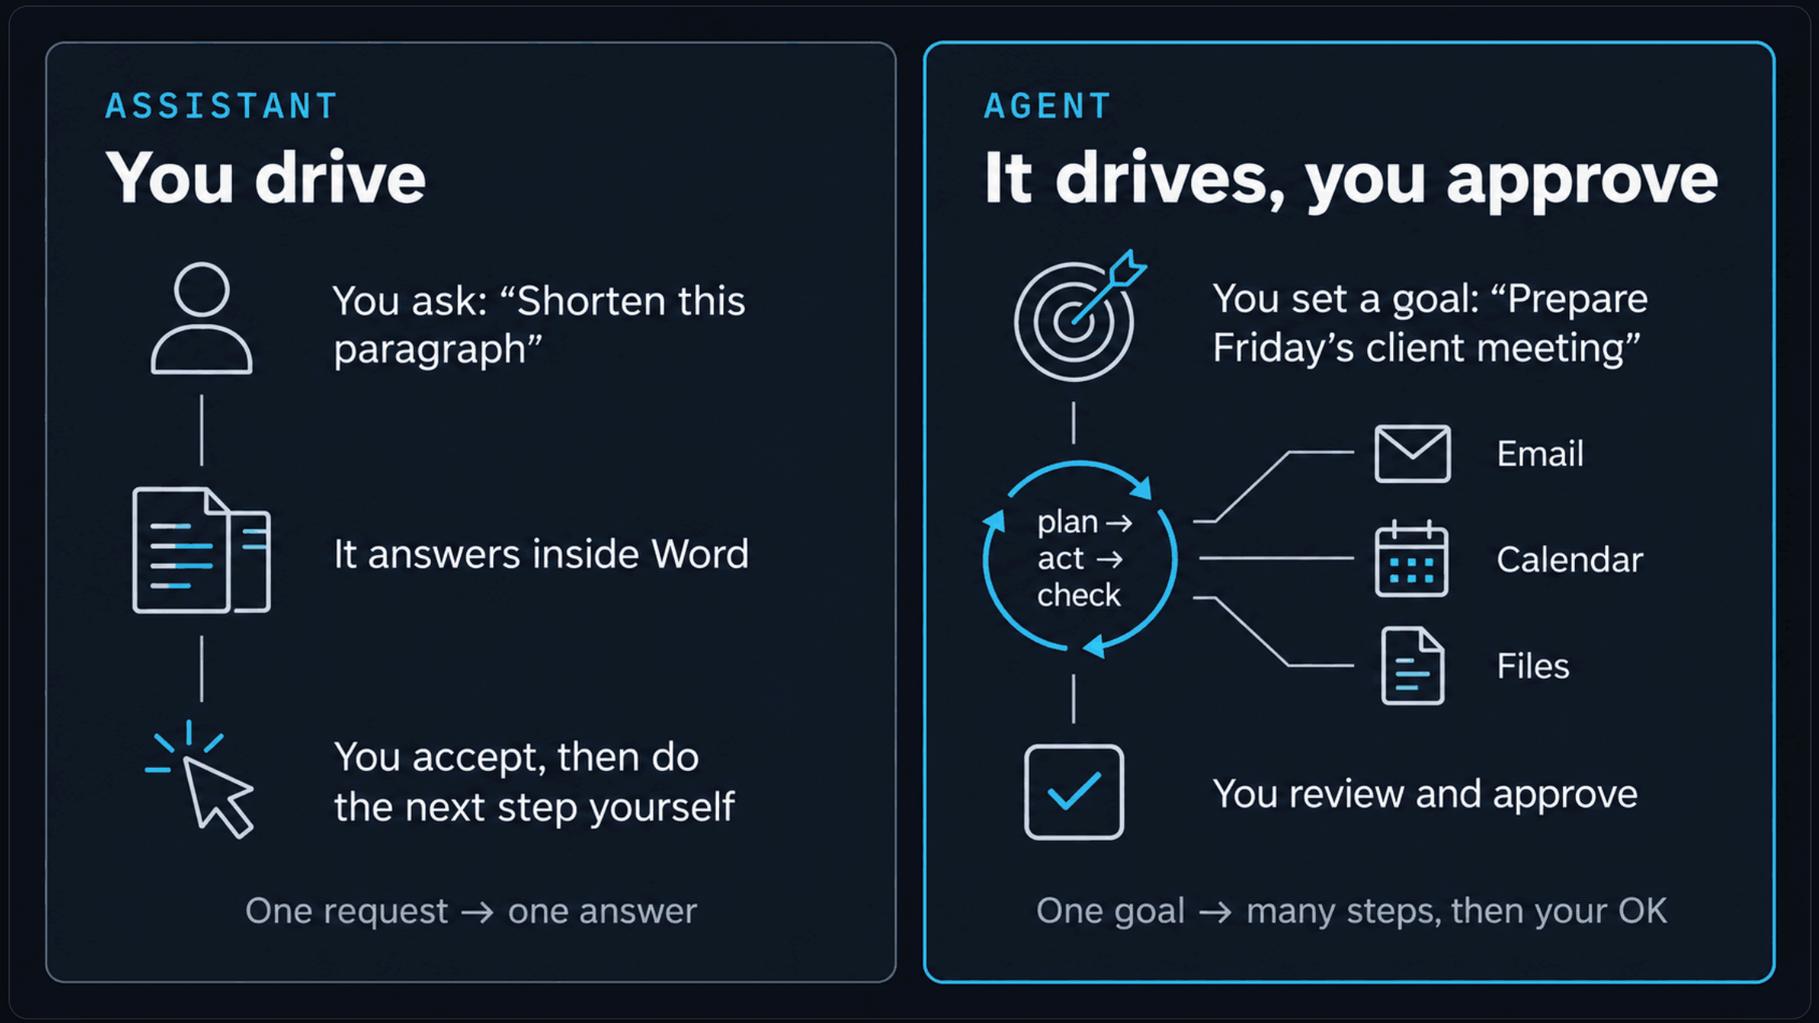

Four stages: what each one adds, with a Copilot example

Our diagram, 13 Oct 2026

NEW WORDS

Assistant or agent: who drives the work

An assistant answers **one request**. An agent gets a **goal**, takes many steps itself, and you approve.

The same Copilot in two roles

Our diagram, 13 Oct 2026

HOW IT WORKS

Inside are the same models you called in L03

Copilot is a wrapper: **a model + what it can see + what it is allowed to do**.

LEVEL 1

Answers

chat: question → text. You copy it yourself.

LEVEL 2

Edits the document

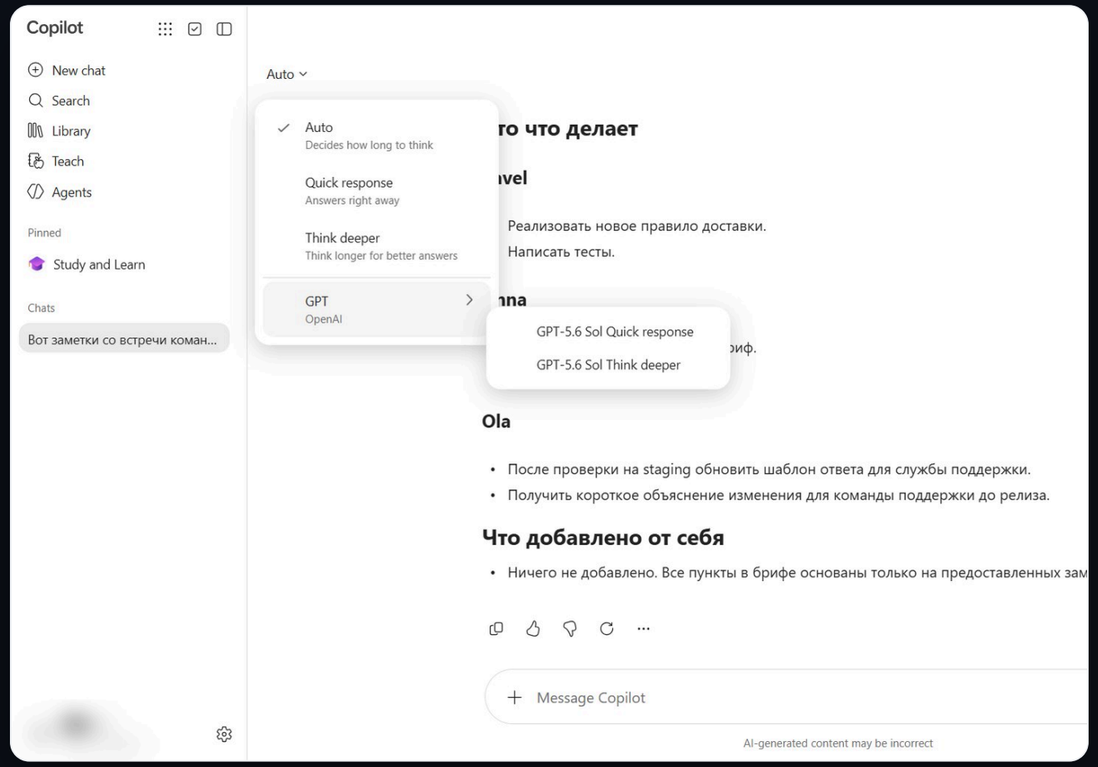

Word, Excel, PowerPoint: changes the file, you see what changed.

LEVEL 3

Does the work (agent)

plans the steps itself: searches, drafts emails, builds files. Asks for approval.

- **Models:** OpenAI GPT, Anthropic Claude and Microsoft's own MAI models. **Auto** picks the model for you.
- Model names change every month: remember the levels, not the names.

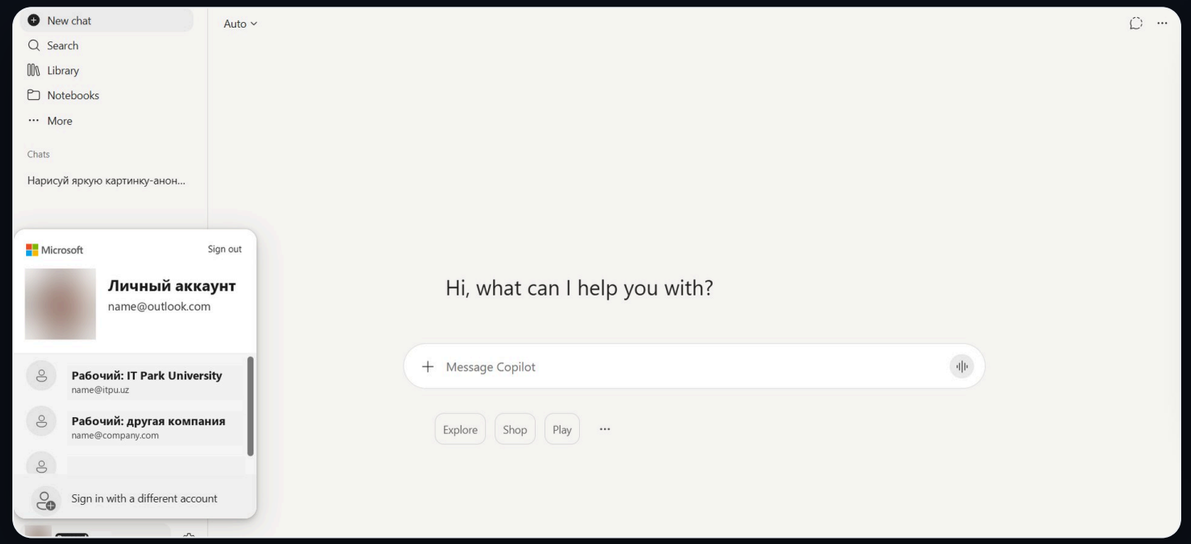

Our work Copilot: **Auto, quick, think deeper, GPT-5.6**

Our capture, 13 Oct 2026

THE APP

One Microsoft Copilot app, two doors

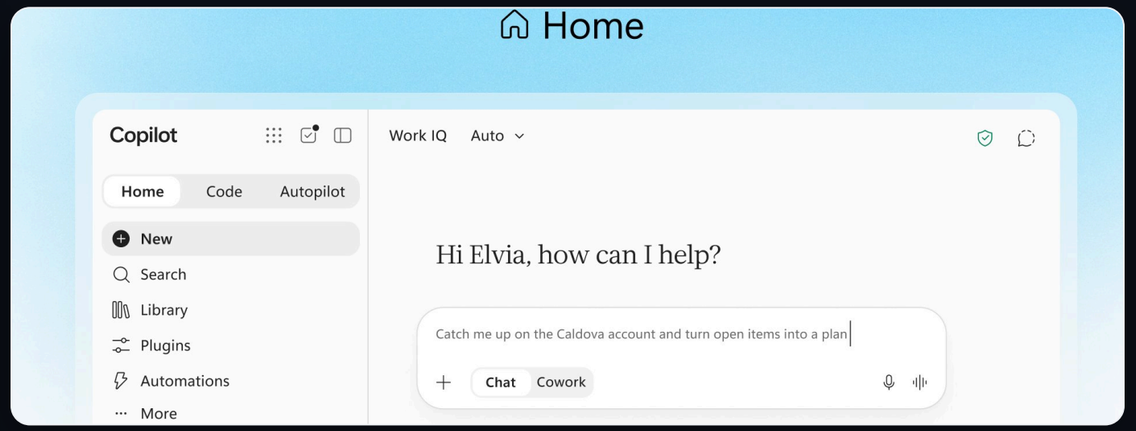

Since September 2026 the personal and work Copilot are one app. **Data never flows between the accounts.**

Account switcher: **personal** and **IT Park work** in one window — Our capture, 13 Oct 2026

Personal: chat, voice, images; sees the web and what you give it

Work: Copilot Chat free; with a licence: your mail, files, meetings

The new Copilot: **Home** · **Code** · **Autopilot** tabs — Source: Microsoft, 25 Sep 2026

NAME DICTIONARY

~~Office app~~ → ~~Microsoft 365 Copilot app~~ → **Microsoft Copilot**

~~Bing Chat~~ → **Copilot**

~~Copilot Pro~~ → **retired → Microsoft 365 Premium**

MONEY OCTOBER 2026

What is free and what is paid

Free is enough for study and this lesson. US prices **as of 13 Oct 2026**; expect changes after Microsoft Ignite (17–20 Nov).

Free

everyone

Copilot (personal)	$0
Copilot Chat (work)	$0
GitHub Copilot Free	$0

Home

Microsoft 365, per month

Personal	$9.99
Family	$12.99
Premium: Researcher, Analyst	$19.99

Work

per user per month, annual

Copilot Business	$21
Microsoft 365 Copilot	$30
GitHub Copilot Business	$19

Agents

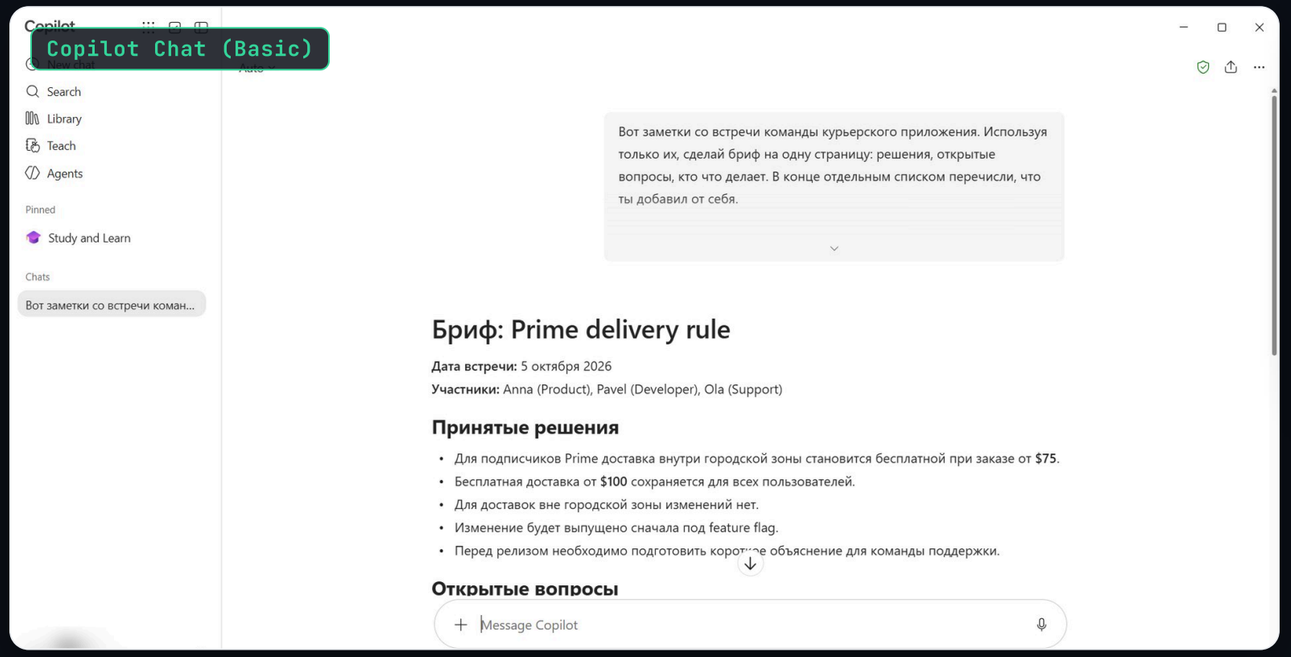

pay as you go

Cowork, Code, Autopilot	credits
newest models	credits
GitHub AI Credits	$0.01

> IT Park students: a school account = **Copilot Chat for free**; GitHub gives students **Copilot Student**. Nothing else is needed for the homework.

DEMO A • FREE COPILOT

Meeting notes → brief → launch picture

Copilot Chat, IT Park school account, **no licence**: a brief from our notes — Our capture, 13 Oct 2026

● free

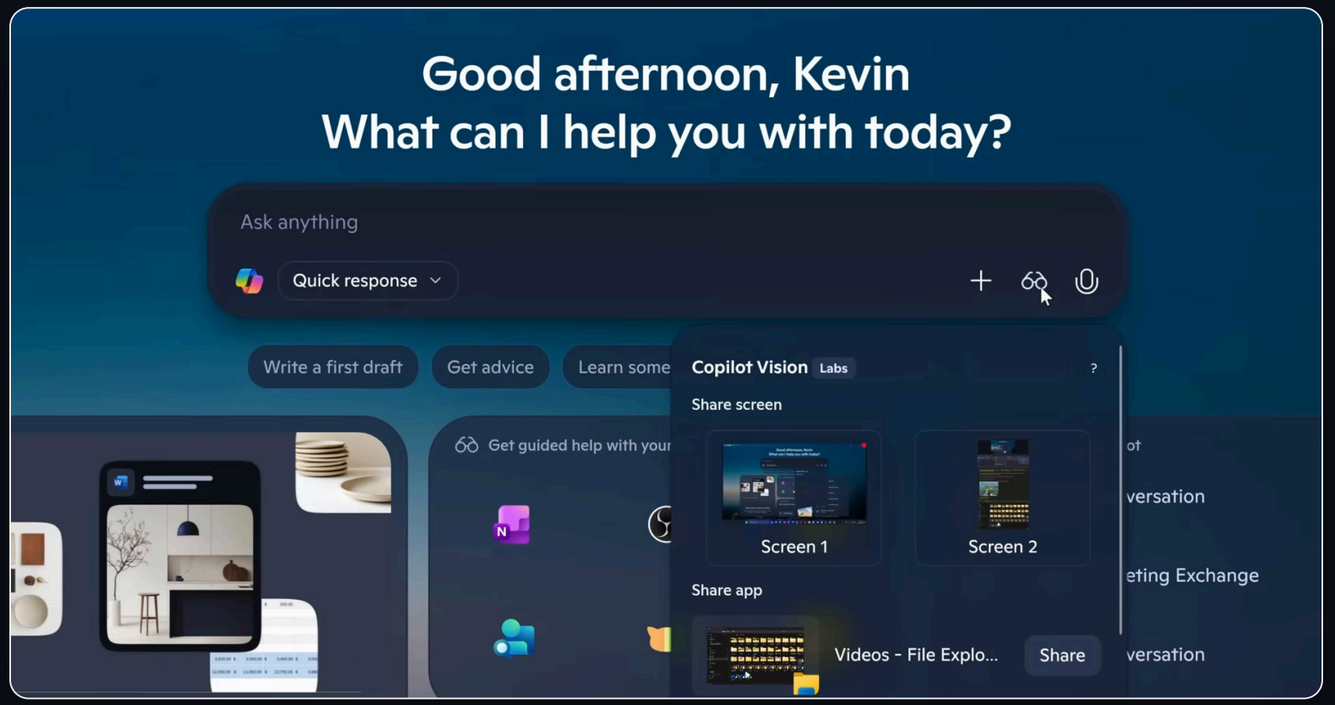

Personal Copilot: **a picture in 30 seconds** — Our capture, 13 Oct 2026

1. Paste `meeting_notes.md` : “Only from these notes, a brief. **At the end: what you added yourself**.”
2. Check: $75 Prime, $100 for all, outside the zone unchanged.
3. “Draw a launch picture” → editor: erase, background, crop.

DEMO B • WOW

Copilot Vision: the assistant sees the window you share

Copilot in Windows: **Share screen / Share app**: you choose what to show

Frame: Kevin Stratvert, YouTube, 22 Oct 2025

1. Open `release_checklist.txt` in Notepad.
2. Copilot → voice → **Vision** → pick the Notepad window.
3. Ask: “Which item catches a fee change outside the zone?” → item 6.

- Sees **only the chosen window**, only while you share.
- Points and highlights, **but does not click for you**.
- No microphone? Paste the text into chat: same result.

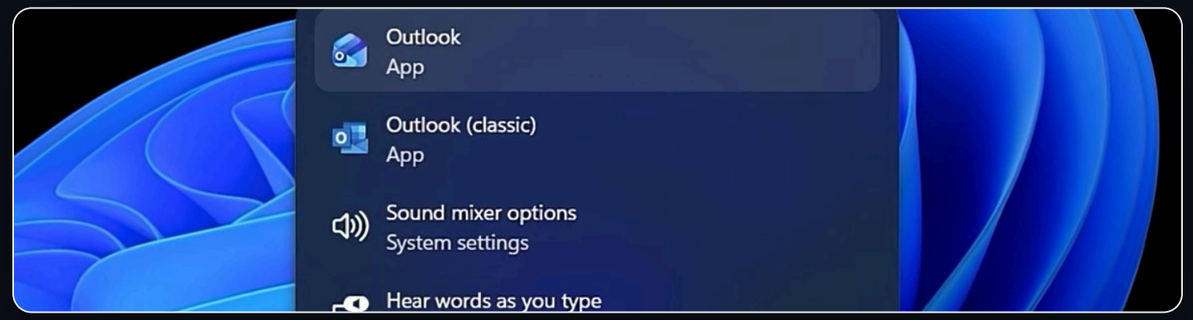

free · preview, not for all

ON YOUR PC • WINDOWS AND EDGE

Copilot in Windows: what it can do and where the limits are

WHAT YOU CAN DO FOR FREE (PERSONAL ACCOUNT)

- **Chat and voice**: on any Windows 11 PC; “Hey Copilot” is a setting.
- **Screenshot and Vision**: share a window; Copilot highlights but **does not click**.
- **Files**: upload or find on the PC and ask about them.
- **Create** an image or a Word, Excel, PowerPoint file from an answer.
- **Connect** OneDrive, Outlook.com, Gmail, Google Drive, Calendar: on copilot.com and mobile.

Ask Copilot on the taskbar

Frame: Microsoft Mechanics, YouTube, 18 Feb 2026

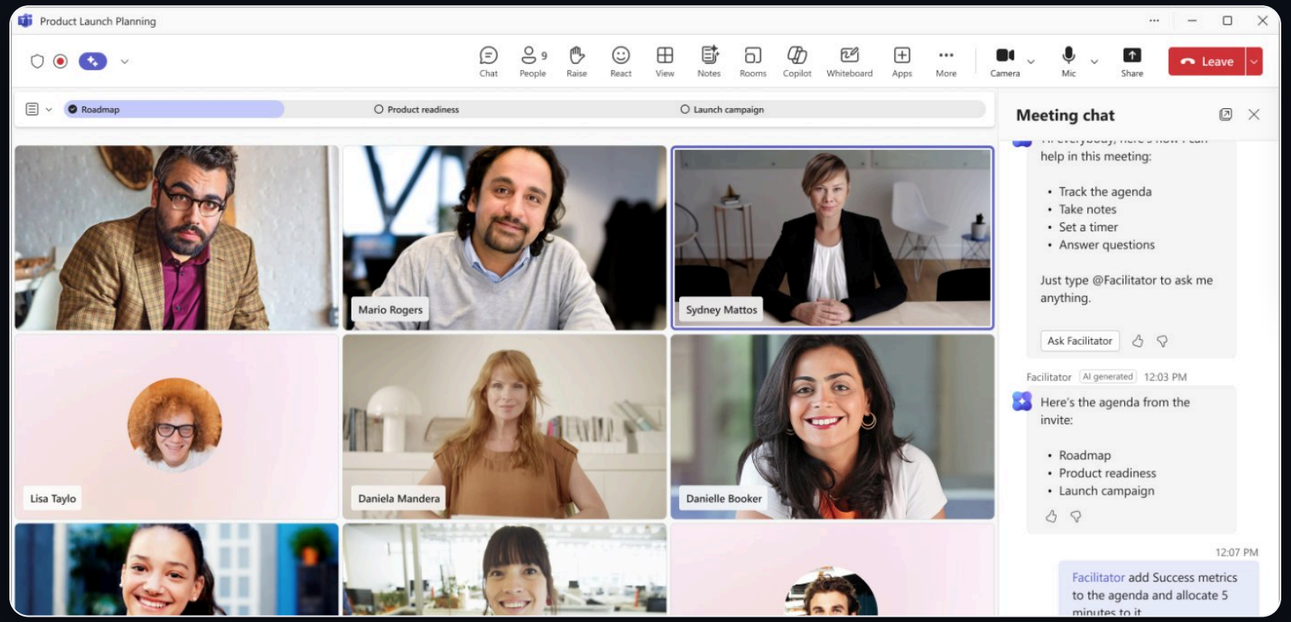

LIMITS (OFFICIAL, AS OF 13 OCT 2026)

20	files per chat
50 MB	per file: PDF, DOCX, XLSX, PPTX, PNG, JPEG, TXT, CSV, MD
18 mo	chat history kept (default)
?	message, length, image and voice limits **are not published**; a Microsoft 365 subscription gives more
Copilot+	Copilot+ PC only: Click to Do, Recall, the Settings agent

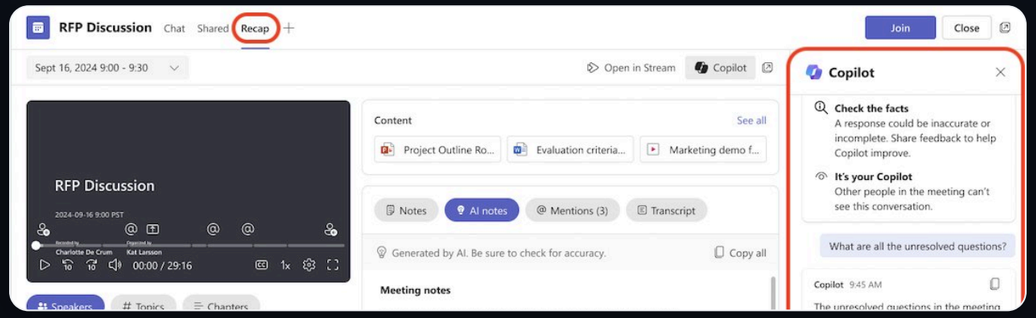

> Personal account: training on your chats is **on by default**. Turn it off: profile → Settings → Privacy → **Training on conversation activity**.

Edge: questions about open tabs and history, Journeys. The separate Copilot Mode closed in May 2026; browser actions: Premium, US only.

Teams: a meeting becomes a recap and tasks

Facilitator in a meeting: agenda, timer, live notes, chat answers Source: Microsoft Support, 2026

Recap after the meeting: notes, tasks, questions to Copilot Source: Microsoft Support, 2026

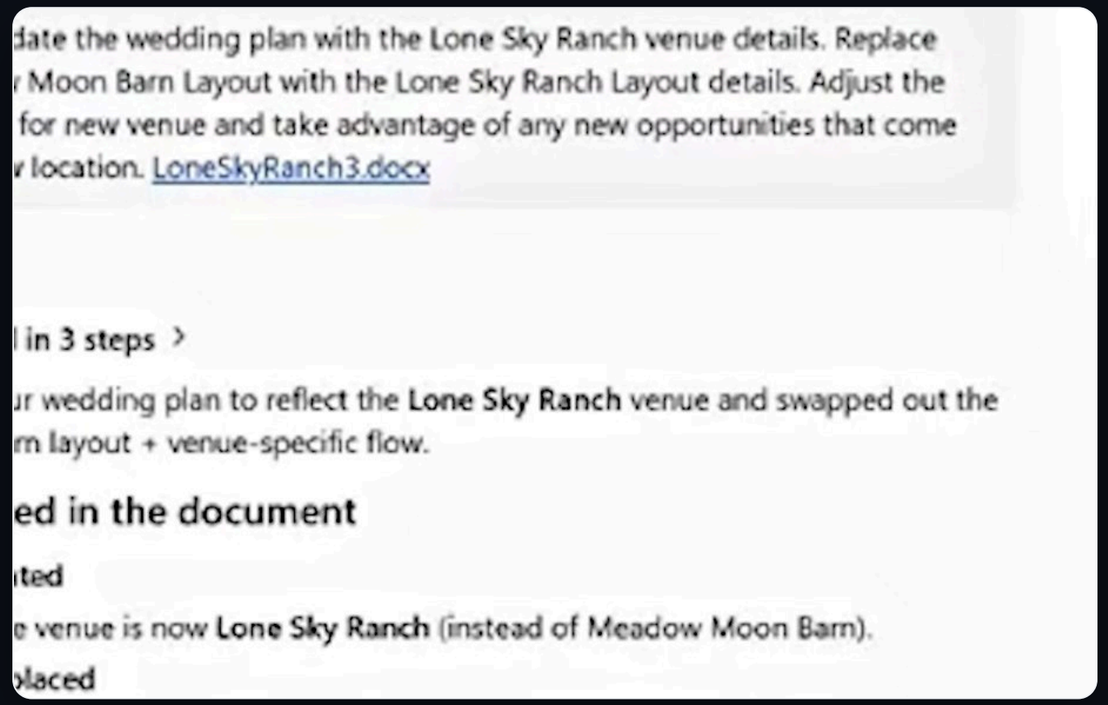

- **During:** “what did I miss?”, “what is still open?”
- **After:** notes, tasks with names, a Word document of the meeting.
- Needs the meeting **transcript**; @Copilot in chat is in preview.

work licence · preview, not for all

TEAM Anna took no notes in Monday's meeting: Facilitator wrote down **3 decisions, 2 open questions and 3 tasks**.

FOR WORK • WORD

Word: a draft from a file and edits right in the document

Copilot in Word: the prompt points to a file; on the right, **“What I updated in the document”**

Frame: Microsoft Copilot, YouTube, 9 Jul 2026

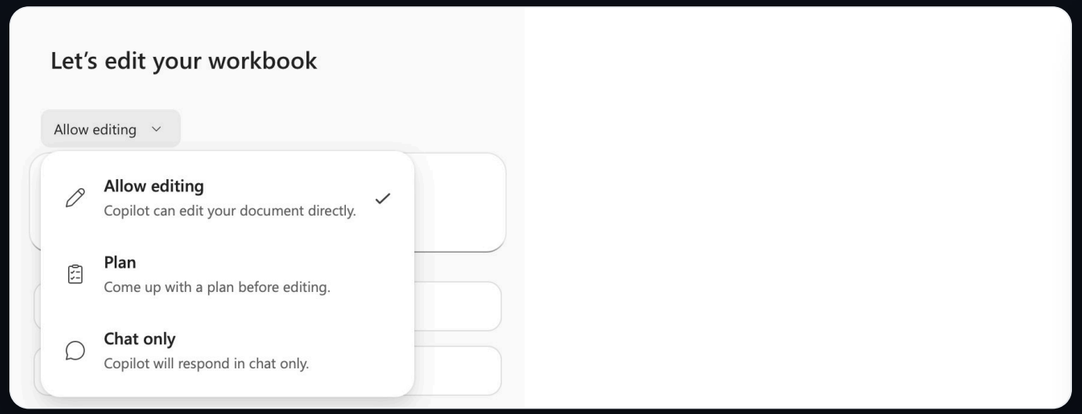

- **Draft:** “write a brief from /meeting_notes”: Copilot uses your file as the source.
- **Edit:** select a paragraph → “shorter”, “simpler”, “as a table”.
- **Check:** Copilot highlights the changed words and cites the source.

work licence

TEAM Anna's brief from slide 8 is the same prompt in Word, with a file instead of pasted text.

FOR WORK • EXCEL

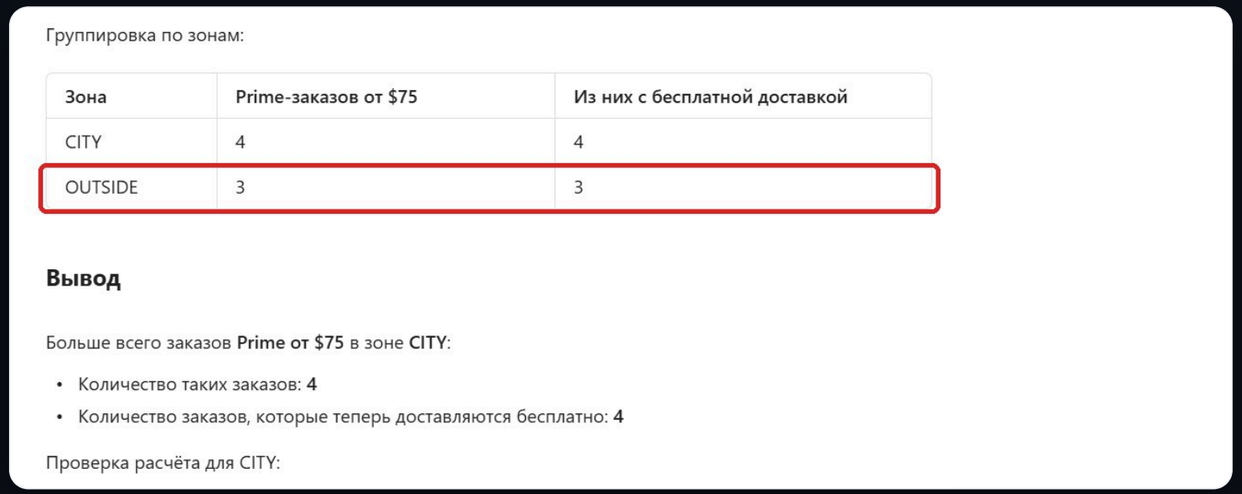

Excel: ask the table in words, then check the numbers

Three modes: **edit · plan · chat only** Source: Microsoft Support, 2026

- Formulas, pivots, charts, formatting: in words.
- The `=COPILOT()` function from old videos was removed on 14 Sep 2026.

work licence

Группировка по зонам:

Зона	Prime-заказов от $75	Из них с бесплатной доставкой
CITY	4	4
OUTSIDE	3	3

Вывод

Больше всего заказов **Prime от $75** в зоне **CITY**:

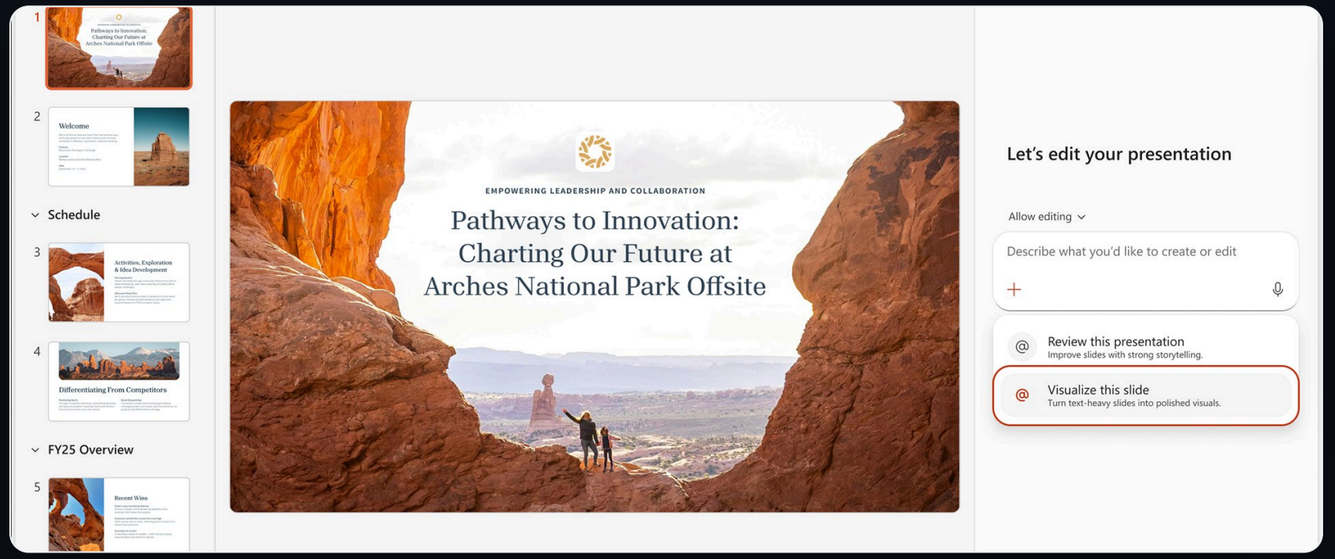

- Количество таких заказов: **4**
- Количество заказов, которые теперь доставляются бесплатно: **4**

Проверка расчёта для CITY:

Our free Copilot Chat, 12 orders: **"3 free outside the zone" is wrong** Our capture, 13 Oct 2026

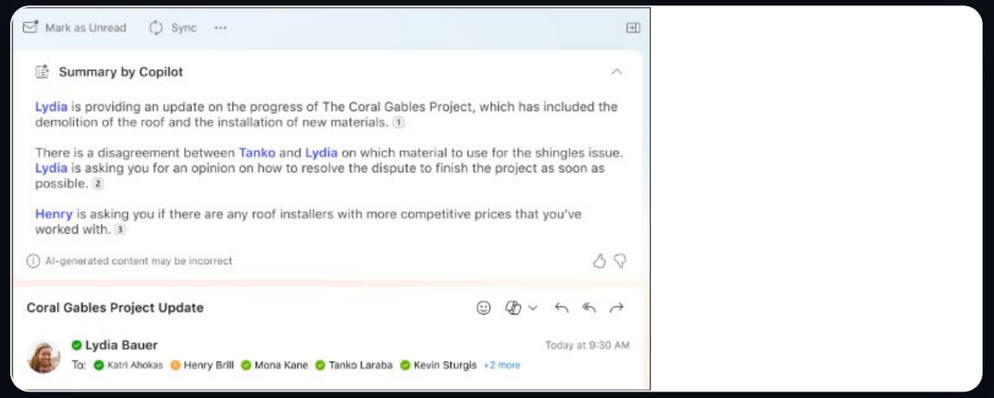

The Prime rule applies **only in the city**. Outside the zone one order is free: #1011 ($130, the "from $100 for all" rule). Copilot did not know the rule because we did not give it, and marked its assumption with an asterisk.

The same button, a different document

PowerPoint: **"Visualize this slide"**: Copilot redesigns the slide Source: Microsoft Support, 2026

- A deck **from a Word document**: Copilot first asks about audience and style.

Outlook: **thread summary** with citations [1] [2] Source: Microsoft Support, 2026

- Draft a reply and set the tone: politer, shorter.
- Sort the inbox in words, with confirmation.

● work licence

TEAM Ola asked Outlook for a summary of customer complaints; Anna turned the brief into 5 slides for management.

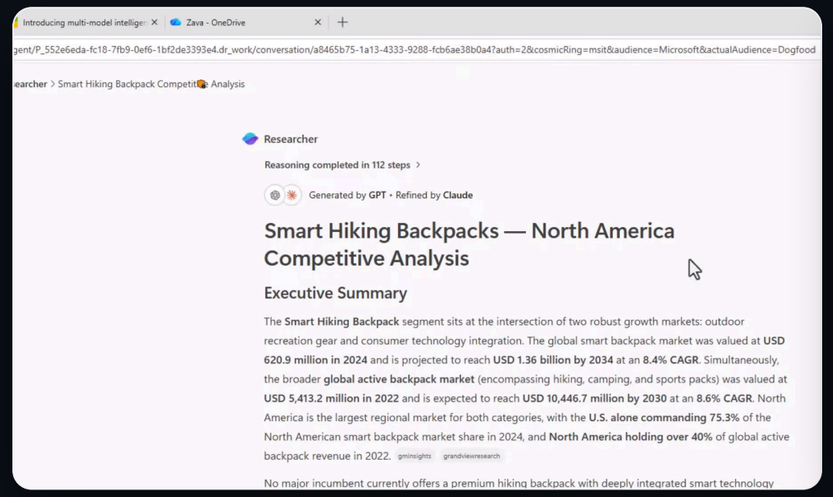

BREAK

5 minutes: coffee and a rest from the screen

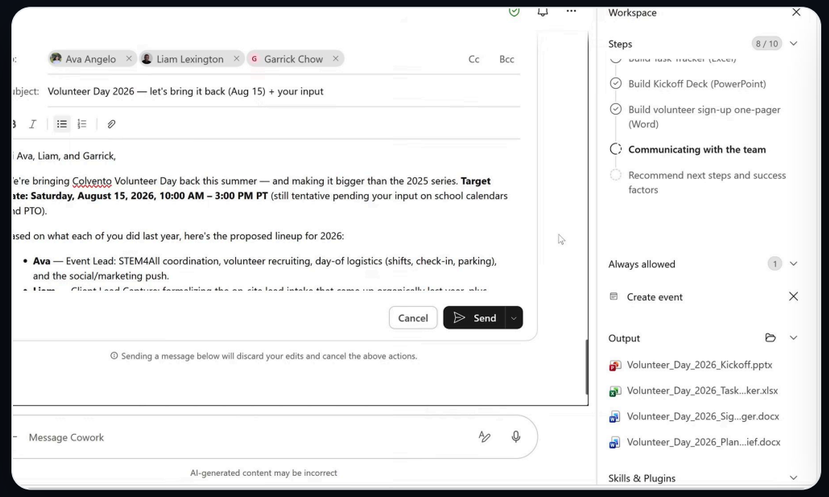

05:00

Next: agents that do the work, your own agent, GitHub Copilot, Copilot for companies, a game and homework.

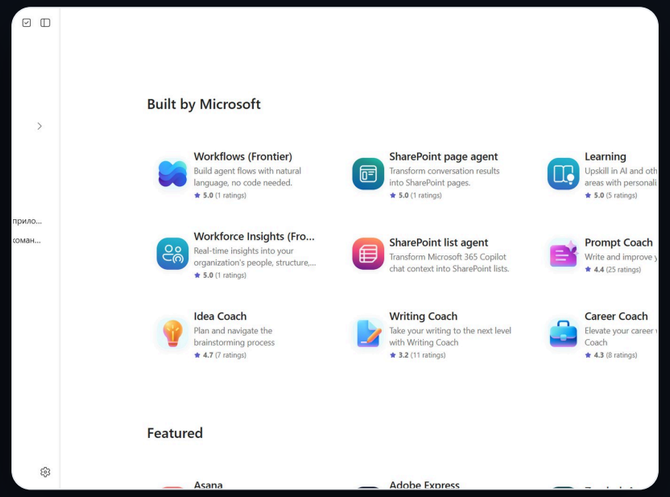

Agents: Copilot does the work, not just answers

Researcher: a cited report; “generated by GPT, refined by Claude”
Frame: Mike Tholfsen, YouTube, 13 Apr 2026

Cowork: step plan, an email waiting for your “yes”, finished files
Frame: Kevin Stratvert, YouTube, 16 Jul 2026

The **Agent Store** in our Copilot Chat
Our capture, 13 Oct 2026

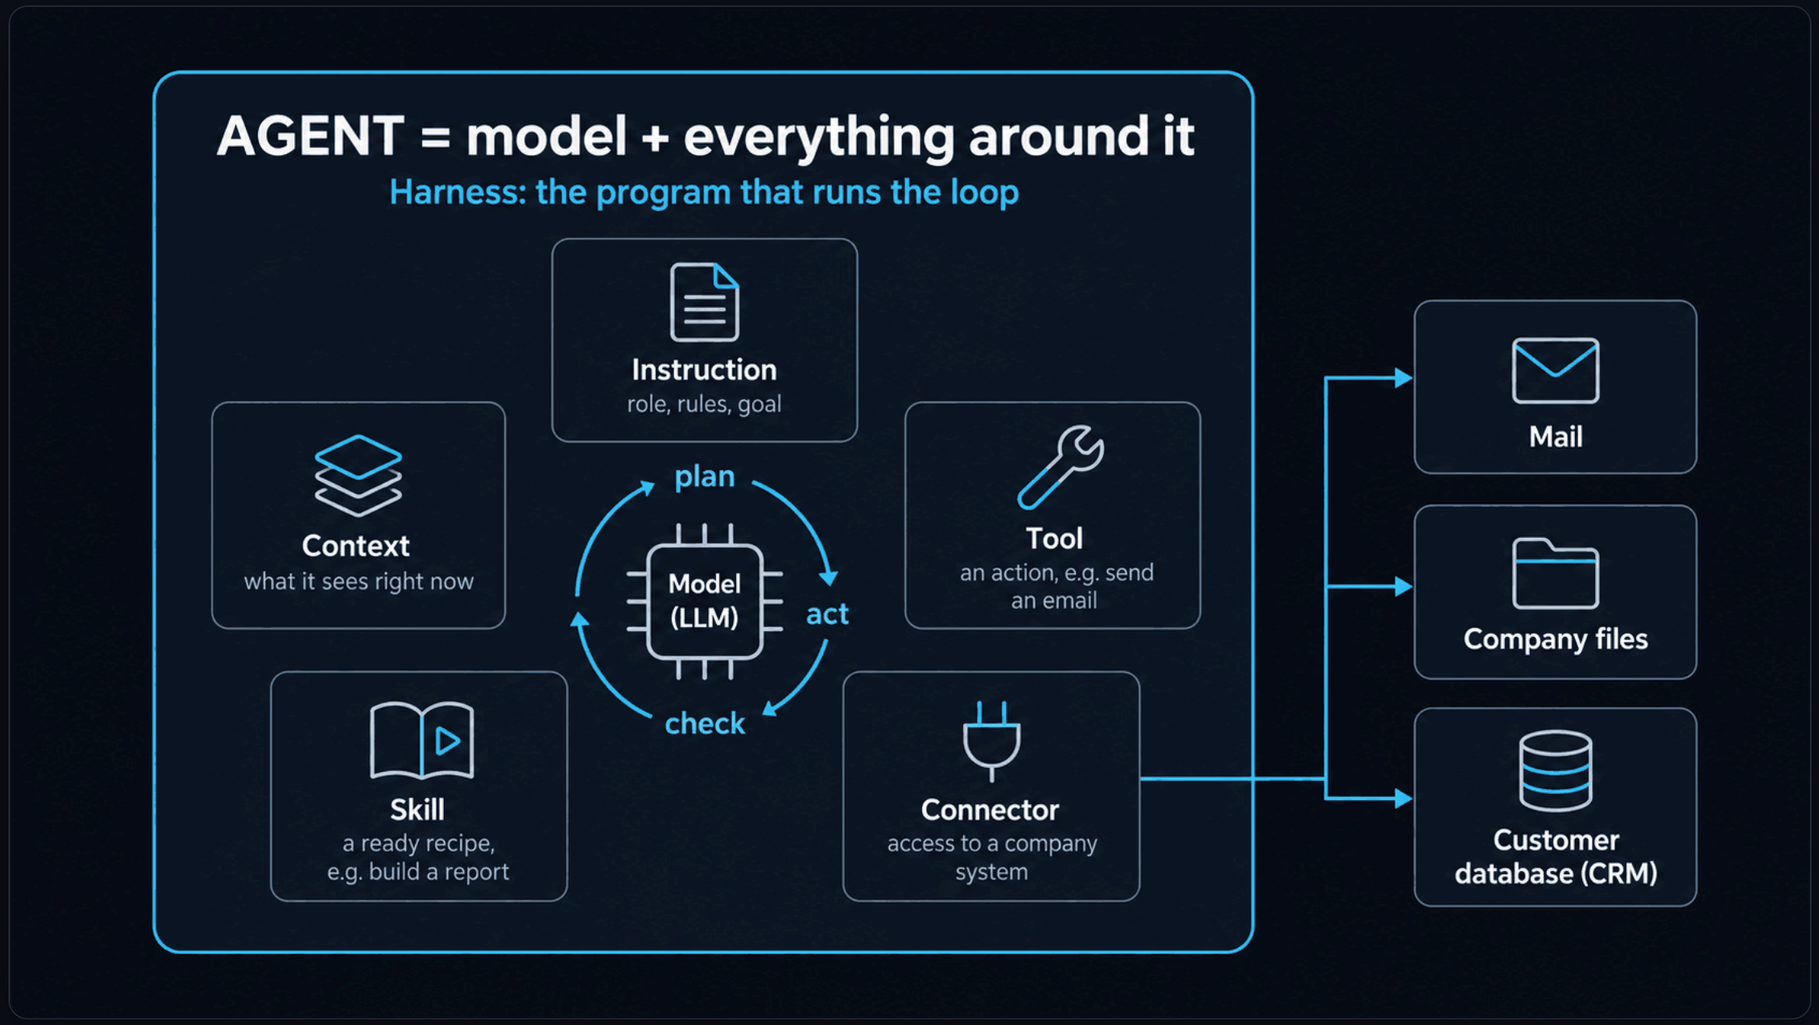

● work licence ● work licence ● preview, not for all ● free

at home: in the Microsoft 365 Premium subscription

- **Researcher**: multi-step research over the web and your files, a cited report.
- **Cowork**: describe the result; it builds documents, emails, meetings; **asks for approval**.
- **Analyst**: analysis of uploaded tables: trends, forecasts (more in L08).
- **Autopilot**: a background agent “on duty”, still a private preview.

Anatomy of an agent

The **harness** is the program that runs the loop and plugs in the other parts. In Agent Builder you fill them in yourself.

Five parts around the model and connectors to company systems

Our diagram, 13 Oct 2026

YOUR OWN AGENT • AGENT BUILDER

An agent is Copilot with your instructions and your knowledge

Agent Builder exists **even in the free Copilot Chat** of the IT Park school account: Agents → New agent.

Instructions
who you are, how you answer, what you never do

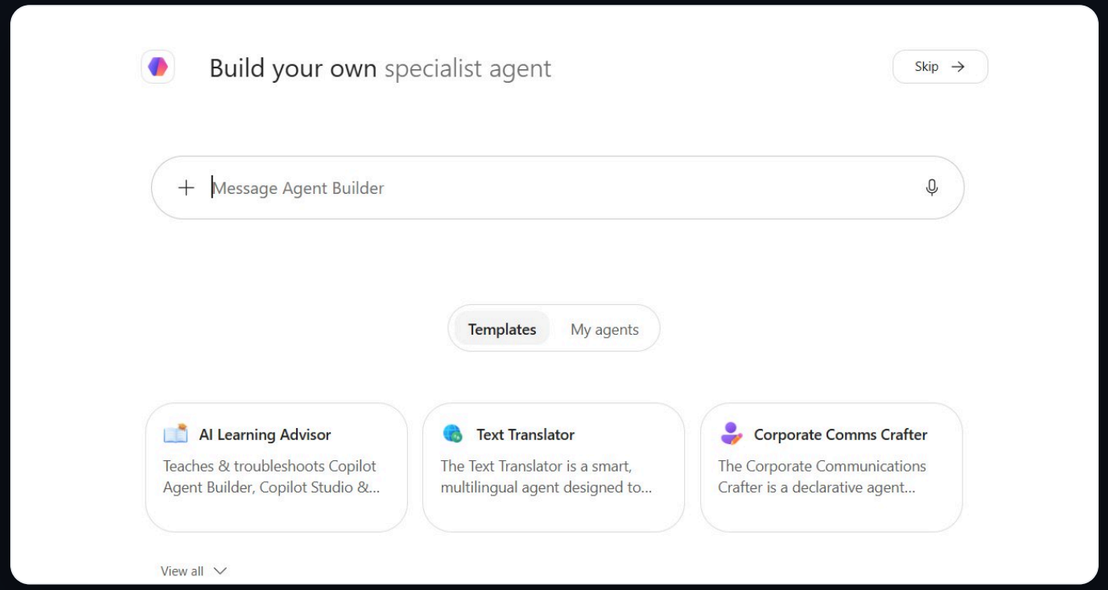

Knowledge
free: the web and up to 4 sites; files and SharePoint if the organisation enabled billing

Skills
code and Word/Excel/PowerPoint files, images: on by default

Starter prompts
suggestion buttons for the user

IDEAS FOR STUDENTS AND TEAMS

- **Support helper**: answers from the delivery rules (our example)
- **Rubric checker**: compares homework with the 6 checks
- **Post writer**: drafts announcements in the brand style
- **Course tutor**: explains lesson topics and quizzes you
- **Translator**: the Text Translator template: RU ↔ EN ↔ UZ
- **Department FAQ**: answers from the study-rules files

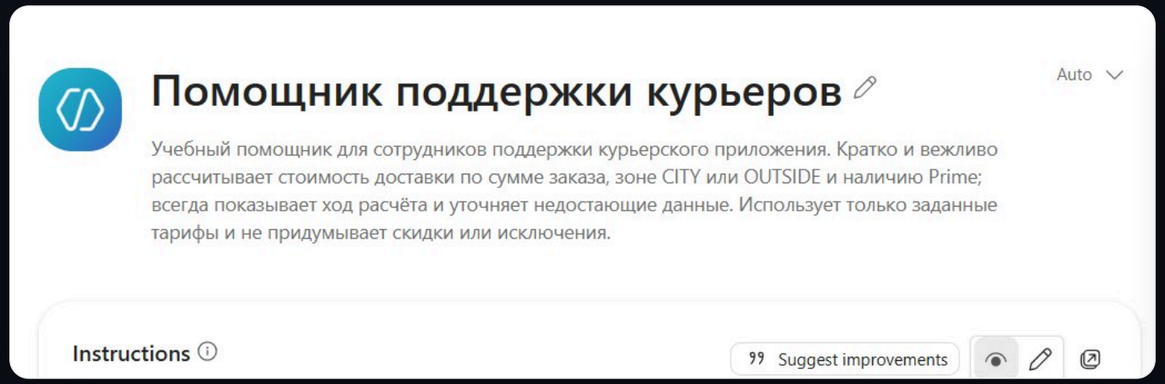

Agent Builder: **describe the agent in words** or start from a template

Our capture, 13 Oct 2026

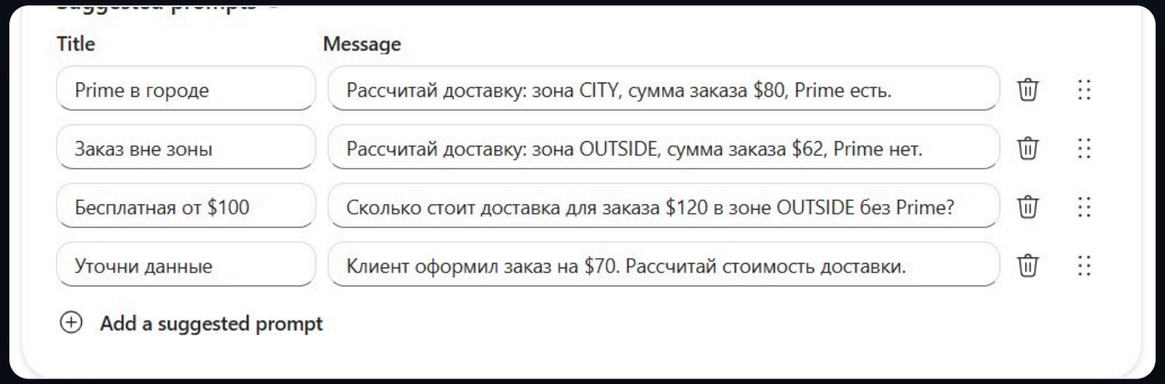

free · preview, not for all

IT can turn the feature off in an organisation. For companies and complex workflows: Copilot Studio.

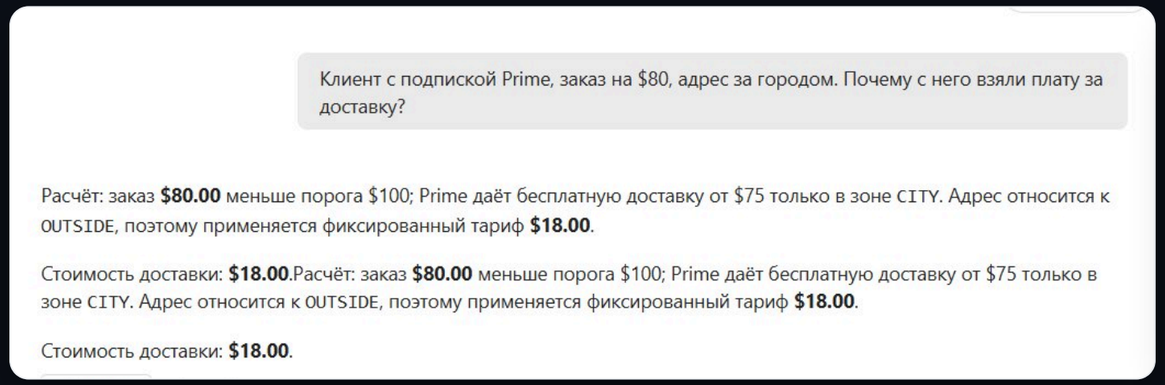

We built a support agent in 5 minutes: a real run

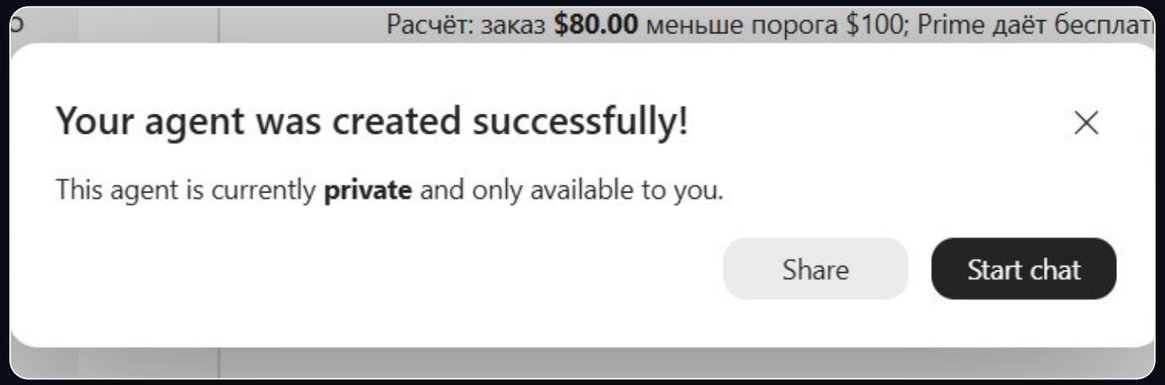

1. Described it in words: Agent Builder wrote the name, description and instructions — Our capture, 13 Oct 2026

2. Checked the settings: knowledge, web search, 4 starter prompts — Our capture, 13 Oct 2026

3. Test in Preview: Prime, $80, outside the zone → $18.00, correct — Our capture, 13 Oct 2026

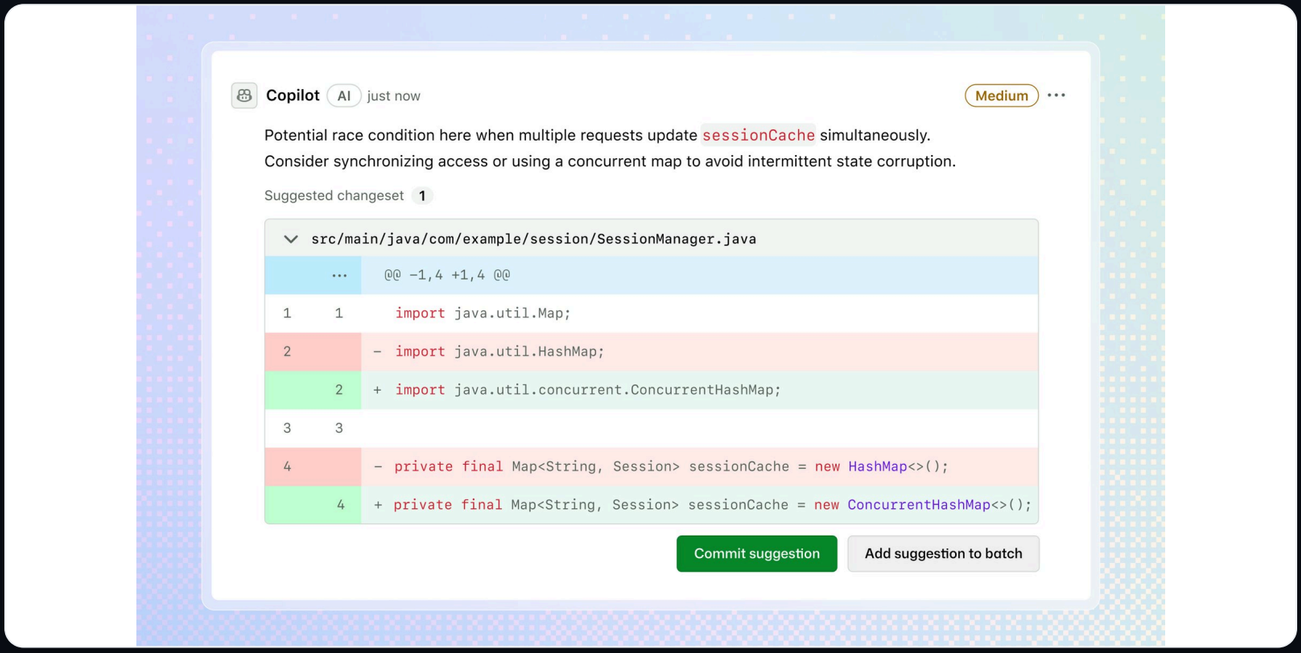

4. Create → the agent is **private**; share with the Share button — Our capture, 13 Oct 2026

Our prompt: “Create a ‘Courier support helper’ agent… Prime is free from $75 only in the city; from $100 free for all; city $7.50, outside $18.00. **Show the calculation, ask if data is missing, never invent discounts**.” Asked “how much is delivery for $70?”, the agent asked back for the zone and Prime.

FOR DEVELOPERS

GitHub Copilot: Copilot for code (more in L16)

Copilot reviewing a pull request: **finds a problem and suggests a fix**

Source: GitHub blog, 2 Jun 2026

- **Editor** (VS Code etc.): completions, chat, agent.
- **github.com**: pull request review, a cloud agent per issue.
- **Terminal and app**: Copilot CLI, the GitHub Copilot app.
- **In Teams**: GitHub Copilot as an agent (October 2026).

OUR REAL RESULT: THE PRIME RULE IN 2 LINES, 7 TESTS GREEN

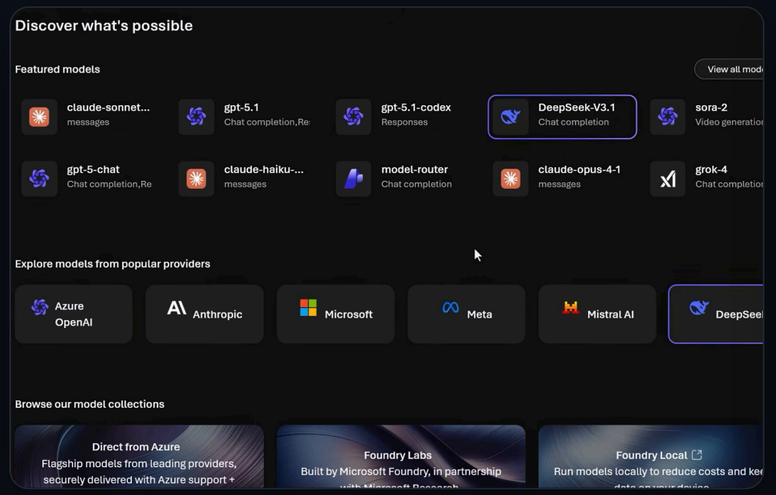

```
+    if order.zone.upper() == "CITY" and order.is_prime and
order.subtotal >= 75:
+        return 0.0
```

● free

FOR THE COMPANY

Copilot for the company: three examples

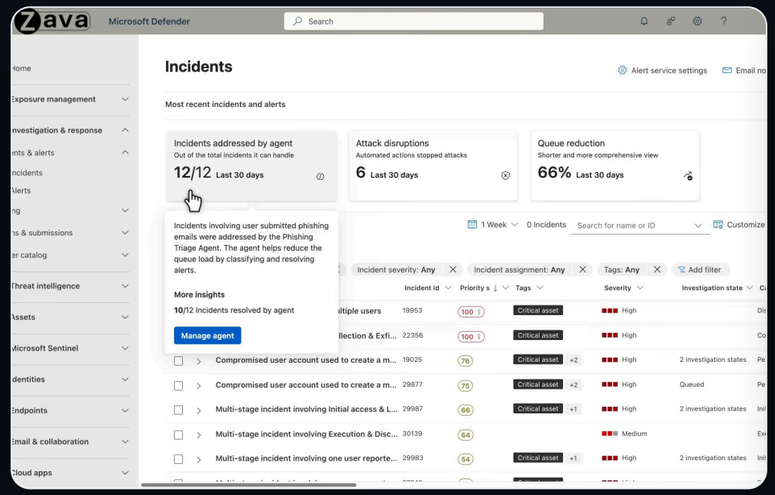

Microsoft Foundry

models and agents for developers: GPT, Claude, DeepSeek, Grok...

Frame: Microsoft Mechanics, YouTube, 3 Dec 2025

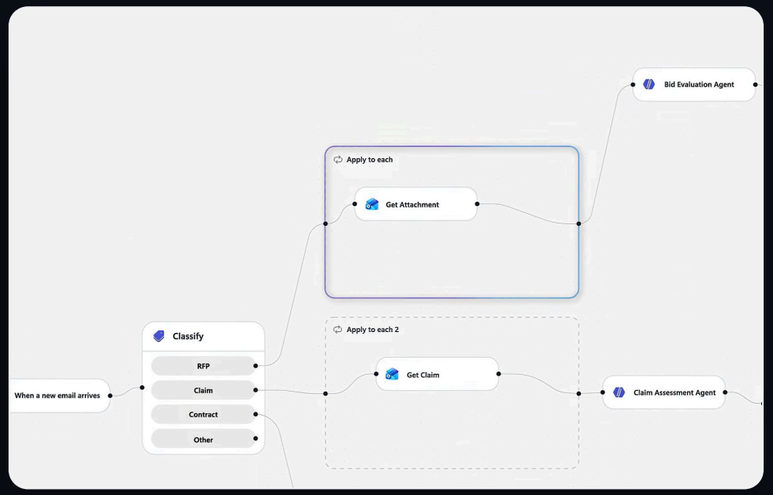

Security Copilot

an agent triages suspicious emails itself: 12 of 12

Frame: Microsoft Security, YouTube, 3 Feb 2026

Workflows: Copilot Studio, Power Platform

a flow: email arrives → classify → an agent evaluates

Frame: Microsoft Mechanics, YouTube, 5 Oct 2026

> Also in the family: **Dynamics 365** (sales and service), **Power BI / Fabric** (reports), **Dragon Copilot** (doctors), **Agent 365** (inventory and protection of all company agents).

GAME • TEAMS POLL

Where does this question go?

For each question pick zone A–D from slide 2. Answers are in the speaker notes.

A · for you | B · for work | C · for developers | D · for the company

QUESTION 1

“Summarise the meeting I missed”

QUESTION 2

“What is this error in the window?”

QUESTION 3

“Why did the test in the pull request fail?”

QUESTION 4

“Draw a cover for my post”

FOUR SAFETY RULES

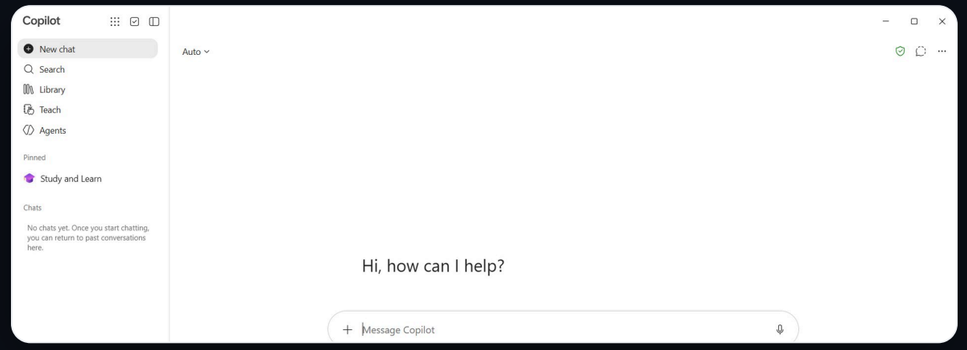

- Copilot sees **only what you can open**.
- **No passwords, keys or customer data** in chat.
- Work data is **protected by contract**; in a personal account **turn training off**.
- An answer is **a draft**: check numbers and names.

PRACTICE

Homework: the courier team's week with Copilot

Only free Copilot is needed: **personal** or **IT Park school**. Hand in one document with screenshots.

1. **Brief** from `meeting_notes.md` + “what Copilot added” + one invention or mistake you found.
2. **Table:** paste `orders.csv` as text, ask the slide 13 question **with the rule**, and check by hand.
3. **Creative:** text for 3 slides **or** a launch picture.
4. **Your map:** 5 tasks from study or work → which Copilot, what it sees, whether it is free.

Here: the IT Park school account, **Copilot Chat** Our capture, 13 Oct 2026

GRADING: 6 CHECKS

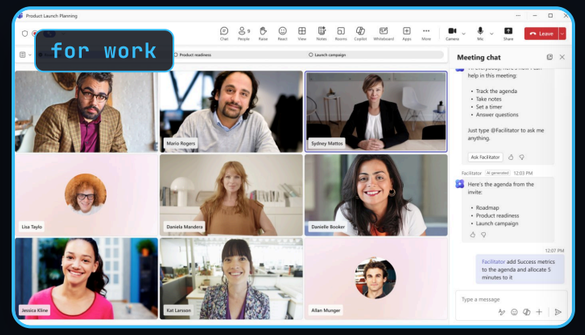

- source named
- inventions marked
- numbers checked by hand
- real screenshots
- the map names the product and what it sees
- no names, e-mails, secrets

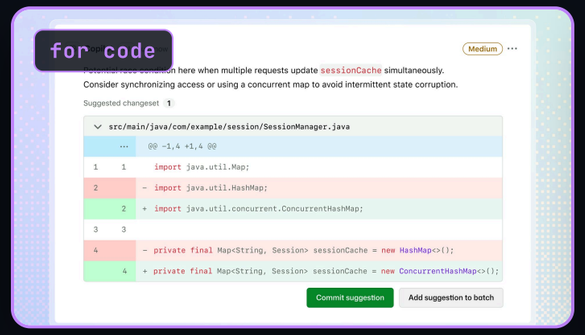

Files: `demo_courier_copilot/`. Synthetic data only.

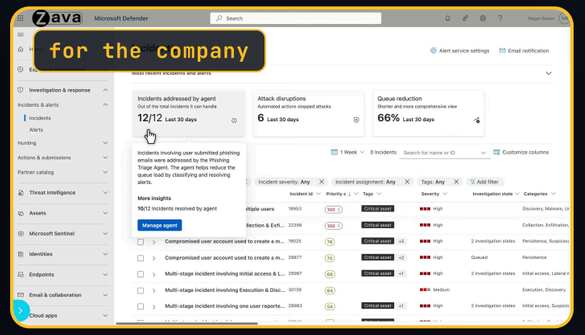

SUMMARY

The Copilot family in one line: for you · for work · for code · for the company

- First ask: **whose information is it and where does it live?**
- Same models inside; the difference is **what Copilot sees and is allowed to do**.
- Free: personal Copilot, Copilot Chat, GitHub Copilot Free.
- An agent does the work but **asks for your “yes”**.
- Every answer is a draft: **check the numbers**.

In chat: which Copilot will you try this week, and for what?

Next: L08, AI for data analysis. Chatting with a file, code that does the maths, and checking the conclusion on a practice sales table.
